

Fisheries & Marine Science

Mentorship Program

In 2021 CFOS graduate students founded a mentorship program to pair undergraduate and graduate, postdocs, and professional marine scientists to help navigate graduate school and early career development. The program has grown with support from the Alaska chapter of the American Fisheries Society and the Alaska Student Chapter of the Society for Marine Mammalogy.

From advice on navigating registration, grants, healthcare, and professional networking to simple guidance on local trails and housing, we hope this program will help to fill in the gaps that formal handbooks and guides cannot satisfy.

To be paired as a mentor or mentee, please use the QR code to fill out our survey or contact anyone on the leadership team.
