

ISAAH Scientific Art Competition

We are again holding a Scientific Art Competition during the ISAAH!

Artwork should represent some aspect of aquatic animal health. You can enter up to 2 times in **each** of the three art categories:

- i. **Macroscopic photograph** = macro parasites, hosts, disease signs
- ii. **Micrograph** = light, stained, unstained, EM
- iii. **Artistic** = drawing, painting, sculpture, graphic or photo that has been substantially altered

Print artwork ~8" x 10" (A4/Letter, ~20 x 25cm). Include a caption with a short description, the image type, and your name and affiliation (see examples below). Submit your entries EITHER at the meeting when you pick up your registration packet, OR you may mail them in advance (post needs to be received by Monday August 27) to: David Groman, Atlantic Veterinary College, 550 University Ave., Charlottetown, PE, Canada C1A 4P3

There will be dedicated poster boards for the art competition and entries will be on display throughout the Symposium. There will be one prize of \$50 for each category, decided by popular vote. Winners will be announced during the Banquet on Wednesday, September 5. Winners do not need to be present.

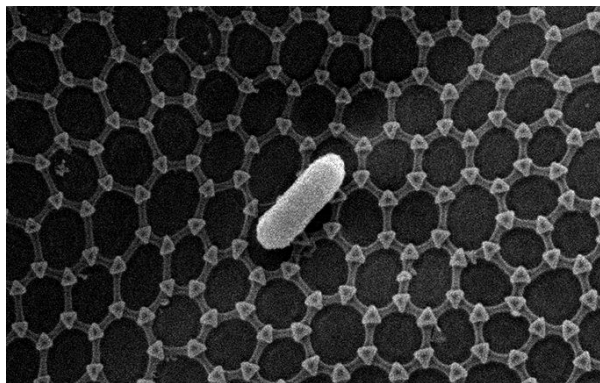

Examples of images and captions:

Category I: macroscopic photograph

Salmincola copepods on gills of Chinook salmon.
Craig Banner
Oregon Department of Fish and Wildlife, USA

Category II: micrograph

Bacterium on surface of springtail
Scanning electron micrograph
Michael Boonstra
Oregon State University, USA
