

# Southern Division American Fisheries Society Meeting February 1 - 5, 2023 Norfolk, Virginia

## Call For Abstracts

Exploring causes and consequences of climate change in streams

Contributed talks will explore natural and anthropogenic factors (i.e. climate change) that contribute to spatiotemporal variation in ecosystem processes and how this variation affects habitat quality and biotic responses at the individual, population, and community levels. **Due November 15, 2022**

## Stream Temperature Workshop

Intro to continuous stream temperature monitoring methods

Study design

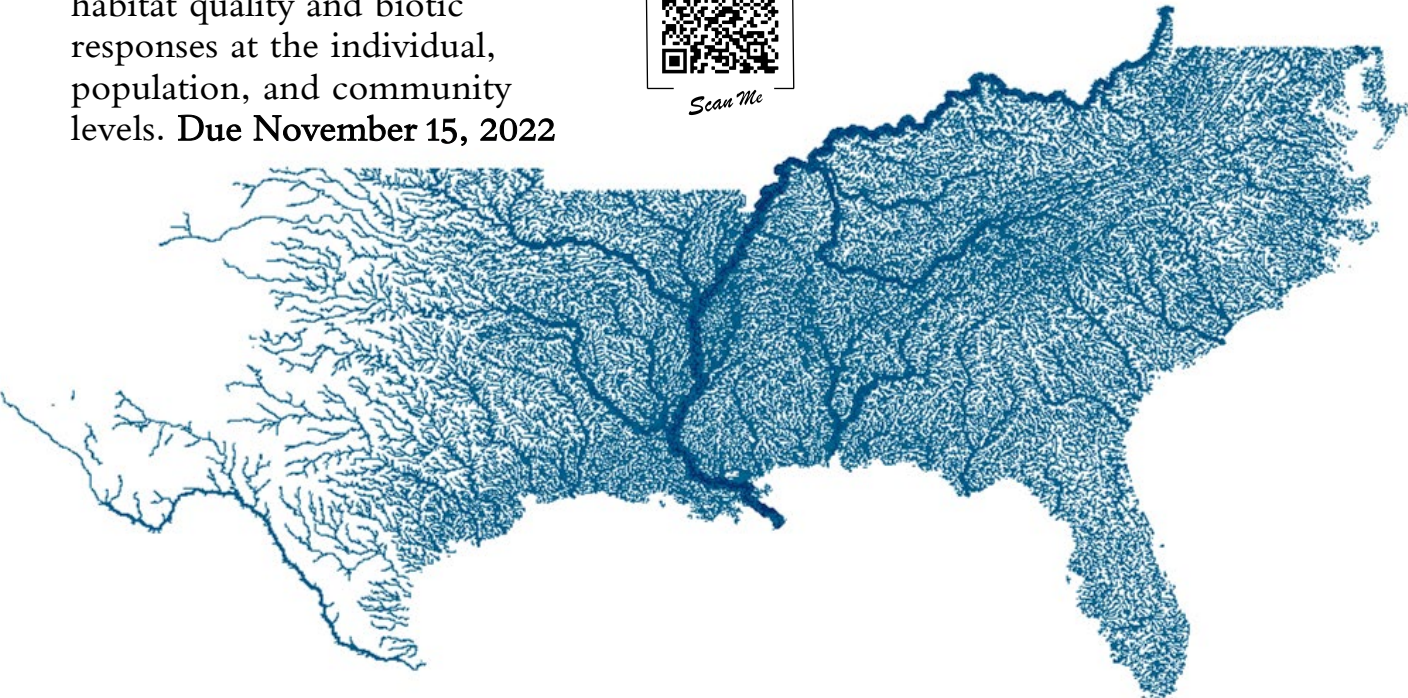

Data collection

Data processing in R
